Cybersecurity Security incidents

Personal data breaches

At the same time that organizations, knowing how valuable the data they process really is, look for ways to improve their data security, malicious agents are constantly searching for ways to get around that security and obtain information they are not authorized to access.

In this scenario, the question is **what to do in the event of a security incident?**

This e-book offers some tips from a legal point of view on how to deal with situations that involve data breaches, especially of personal data, in light of Brazil's General Data Protection Law (LGPD – *Lei Geral de Proteção de Dados Pessoais*).
