The challenges in achieving universal water supply and sewage services in Brazil are great, and the target is 2033. An essential factor in meeting this deadline is partnerships between the public and private sectors to make the required investments, which in turn generates a number of business opportunities.

For this reason, we've put together an overview of current service coverage, sector regulations and some of the incentives offered by government.

Read below some topics:

- Coverage Levels
- Who is responsible for the services
- New Legal Framework for Sanitation divides jurisdiction over the sanitation sector into three parts:
 - Planning
 - Execution
 - Regulation
- Investments and Incentives
