Recognition

Once again we have been highlighted by ***Latin Lawyer Elite*** for the excellence of our work and our leadership position in the Brazilian legal market.

The survey recognizes leading firms in Latin America that stand out both for the quality of the services they provide to their clients, and for their governance, strategy for business development, and investment in professional development.

The 2021 Elite edition is based on data from other independent surveys organized by Latin Lawyer, and looks at management practices, including diversity, international experience, and pro bono work.

We are proud to be part of this elite group, and delighted at this recognition of our work, our aims and our leadership role in the legal community.
