We have been named as a global reference in Chambers High Net Worth 2020, a guide to the top practitioners and firms in the area of Private Wealth Law. For the first time, our firm is ranked at the highest level, in Band 1.

In preparing the guide, Chambers conducts an extensive survey that assesses technical legal knowledge, diligence, market vision, and service quality.

According to one market source quoted in this year's edition, "*BMA is a complete firm with all the expertise the client needs in all areas*", stressing the excellence of our full-service model. The guide highlights our services in tax and succession planning and related expertise in corporate and real estate matters.

Another source comments that "*They know how to deal with ultra-high net worth clients and families, understanding their needs and knowing how to manage their expectations*", adding that BMA is a "*one-stop shop*" that can bring together expertise from various practice areas to offer clients outstanding service.

BMA partner Hermano Notaroberto Barbosa was also named in Chambers High Net Worth 2020. According to one source quoted in the guide, he is "*not only a great lawyer from a legal knowledge perspective but also has the soft skills to deal with UHNW families*," while another says that "*his very broad knowledge is essential to address the different regulations and really defining a structure that fits different law requirements, as well as the client's needs*."

The exceptional recommendations won by our practitioners are evidence of their dedication to excellence in their practice and their role in enabling our firm to achieve this prestigious recognition.
