Restructuring and Insolvency

Once again, our Restructuring and Insolvency practice has been recognized by **Law Business Research** in **GRR100**, Global Restructuring Review's guide to **restructuring and insolvency firms and practitioners around the world, especially those active in cross-border cases**.

The selection process involves a careful analysis, taking into consideration significant cases in the economic sectors covered in the research.

The constant presence of our practitioners in publications focusing on different areas of practice is the result of our multi-disciplinary approach, the consistent, dedicated work of our professionals, and their commitment to excellence.

Congratulations to all on this important achievement!
