Recognition Tax

BMA is considered to be a reference among Brazilian law firms by the International Tax Review – ITR, a guide to the best tax firms and practitioners around the world. In ITR's most recent publications, we are highlighted in the World Tax guide, in the General Corporate Tax, Transactional Tax, and Tax Controversy categories, and in the World Transfer Pricing guide.

To award this recognition, the International Tax Review conducted an extensive survey to obtain feedback from more than 10,000 clients, and heard about 2.700 peers.

With this final round of ITR guides released this year, we are happy to know that we have made a difference in this market, through the dedication of our lawyers. In all, we have been recommended in the following ITR guides: World Tax, World Transfer Pricing, Women in Tax Leaders, Tax Leaders, Tax Controversy Leaders, and Indirect Tax Leaders.

It's an honor to consolidate BMA's reputation for excellence in this area, which provides support in the full range of transactions and operations, from the simplest to the most complex, offering creative solutions to everyday challenges.
