

PRACTICES

Intellectual Property

Exceptional service that combines our scientists' and engineers' technical skills with our lawyers' knowledge of different areas of the law, in pursuit of the best outcomes for our clients

Our practitioners provide a full range of services in protection, management, consultancy, and enforcement of all types of Intellectual Property, including patents, trademarks, copyrights, trade secrets, industrial designs, and plant varieties, along with related areas such as advertising, franchising, e-commerce, entertainment, and geographical indications.

Our expertise spans all technological sectors, including metallurgical and materials engineering, green technologies, artificial intelligence, electrical and computer engineering, telecommunications, consumer products, biotechnology, chemicals, and pharmaceuticals.

Our in-depth knowledge in the field of Intellectual Property, supported by all the resources of a full-service law firm, means that we take a holistic, integrated approach to the diverse needs of each business, and allows us to act as an efficient, specialist business partner to our clients.

With a team that has been internationally recognized in various rankings and awards for providing the best in personalized service, our practice is present worldwide through a global network of partner firms, for coordination and management of our clients' international portfolios with the same strategic focus and technical capabilities we have in Brazil. Our correspondent firms abroad provide the same high level of professional excellence we offer when representing their clients in Brazil.
